

**OTHERS TALK ABOUT THE
ENVIRONMENT – WE ACT: THE DUEKER
SUSTAINABILITY PROMISE.**

RETURN YOUR DUEKER CAST PRODUCTS
TO US. WE WILL TURN THEM BACK INTO
LONG-LASTING QUALITY.

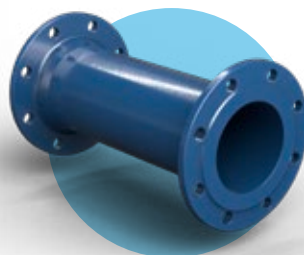

CAST IRON IS OUR MATERIAL.
THE DUEKER SUSTAINABILITY PROMISE

Everything has an end. Even the most durable and tried-and-tested products must be replaced at some point. Once the end has come, we make a new beginning out of it. Our offer: Return your old Dueker products to us, and we will use them to make completely new ones. Not once. Not twice. Again and again. With the same quality. Just as brilliant. Just as powerful. Just as high quality.

That is what we mean by sustainability. Not just for one new product life but for many.

EXCELLENT.
WATER.
SOLUTIONS.

HOW IT WORKS. STEP BY STEP.

At the end of their long life cycle, you return your Dueker cast products to us. We will take them off your hands free of charge, including shipping to our factory, and use them to produce new articles of the same quality.

APPLIES TO ALL DUEKER CAST PRODUCTS.
HERE. IN EUROPE. ALL OVER THE WORLD.

This way, we can ensure that our old products become just as good new products.

EVERYONE GETS SOMETHING OUT OF THIS.
YOU. US. AND THE ENVIRONMENT.

Everyone benefits from the Dueker sustainability promise. You, because we take your old products off your hands. Us, because we can produce the same products again and again. And the environment, because the resource-efficient reprocessing is truly sustainable. And we do it again and again.

DUEKER. EXCELLENT. WATER. SOLUTIONS.
YOUR PARTNER FOR WATER SUPPLY.

At Dueker, we supply our customers in the areas of planning, construction and usage with sustainable premium solutions, high-quality products and individual service. As an international reference provider, we are there for you – in Germany, Europe and worldwide.
