

## Inspection Pipes: The Facelift Continues

Modification of the Düker inspection pipes with rectangular opening

After the facelift of the inspection pipes with round opening has been concluded successfully, the focus is now on the inspection pipes with rectangular opening and therefore the larger diameters.

In the same way as for the round inspection pipes, the sealing chamber will be completely revised in order to optimise pressure tightness and life expectancy of the sealing.

Furthermore, the cover contour - until now flat on the outside - will be changed: in the future, the cover will follow the inside contour of the pipe. The largely smooth inside wall will be beneficial both from the hydraulic and from the acoustic point of view.

Another positive side effect will be a weight reduction of the inspection pipes.

The modification concerns the body with the cover seat, the cover itself and the screw connection. The total length as well as the sealing will remain unchanged.

The switch has already started! DN 100 and 150 are already being supplied in the new version; DN 125 und 200 will follow in the course of the year 2019. The switch will be made automatically, the complete fitting will not be given a new item number. The modification concerns not only SML, but also the coating versions MLK-protec, MLB and TML.

Old Version

New Version

**If the cover of an "old" inspection pipe needs to be replaced, the new cover cannot be used!**

Therefore, covers and screw connections for the "old" inspection pipes will still be available as spare parts. Please use the following item numbers for your orders:

SML DN	complete fitting	previous version						new version					
		spare parts set	cover	single item numbers*				spare parts set	cover	single item numbers*			
sealing	bolt			washer	nut	sealing	bolt			washer	nut		
100	669624	212568	665404	100500	100721	511524	510022	212575	665704	100500	100820	511524	510022
125	669627	212569	665414	100502				212576	665714	100502			
150	669630	212570	665424	100503				212577	665724	100503			
200	669633	212571	665434	100324	501273	511527	100400	212578	665734	100324	501275	511527	100400
250	669612	-	665444	100325				-	665744	100325			
300	669615	-	665454	237931				-	665754	237931			

\*The single item numbers represent one piece each. Of bolt, washer and nut, four pieces are required per cover. Please order accordingly!!
